Lectures	4	5	
COURSE TYPE	SCIENTIFIC EXPERTISE		
PREREQUISITE COURSES	-		
LANGUAGE OF INSTRUCTION and EXAMINATIONS	GREEK		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	YES		
COURSE WEBSITE (URL)	https://eclass.unipi.gr/courses/OEP260/		

2) LEARNING OUTCOMES

Learning Outcomes

The economic and social inequalities constitute a fundamental issue in both economic and political science. In the recent years we observe the enlargement the widening of both economic inequalities and poverty and the emergence of new inequalities, particularly social inequalities. The way with which the state influences the economic inequalities and poverty differs not only between developing and developed countries, but also between developed countries. The purpose of this course is to highlight new economic and social inequalities and poverty, to explore the factors that affect these inequalities and poverty, to analyze the relationship between economic growth and inequality and poverty and to interpret how the state intervenes and reduces economic and social inequalities.

With the completion of the course students will be able to comprehend:

- The concept and the way to measure economic and social inequalities
- the concept and the way of measuring poverty
- the historical development of inequalities and poverty
- the structure of inequalities and poverty
- the relationship between economic inequalities and economic development
- the relationship between globalization and economic inequalities
- the impact of fiscal policy on economic inequalities
- the causes and economic and social impact of poverty
- the relationship between poverty and social exclusion
- the relationship between political institutions and income redistribution
- the ideology of income redistribution
- the ways of combating poverty and the effectiveness of poverty programs
